Write a JS change HTML dom example.

Sure. Here is a simple HTML.

Code BlockHTML

```
1  <!DOCTYPE html>
2  <html>
3  <head>
4      <title>Change Text Example</title>
5  </head>
6  <body>
7
8  <p id="demo">This is a demonstration.</p>
9
10 <button onclick="changeText()">Click Me!</button>
11
12 <script>
13 function changeText() {
14     document.getElementById("demo").innerHTML =
15     "Text has changed!";
16 }
17 </script>
18
19 </body>
20 </html>
```
